Term 1, A.Y. 2026-2027

AI-Use Disclosure

From Minerals to Microchips: The Global Biography of a GIGABYTE GeForce RTX 5070 WINDFORCE

I used ChatGPT (OpenAI) in the conversation *Paper Critique Suggestions* to obtain feedback on my GEWORLD midterm paper. I uploaded the PDF and requested a critique of the writing, with instructions to retain the images and design.

I also asked ChatGPT to reassess its own critique and comment on whether further feedback was necessary. For language assistance, I requested help with grammar, punctuation, and academic wording, followed by a grammatical review of the completed paper.

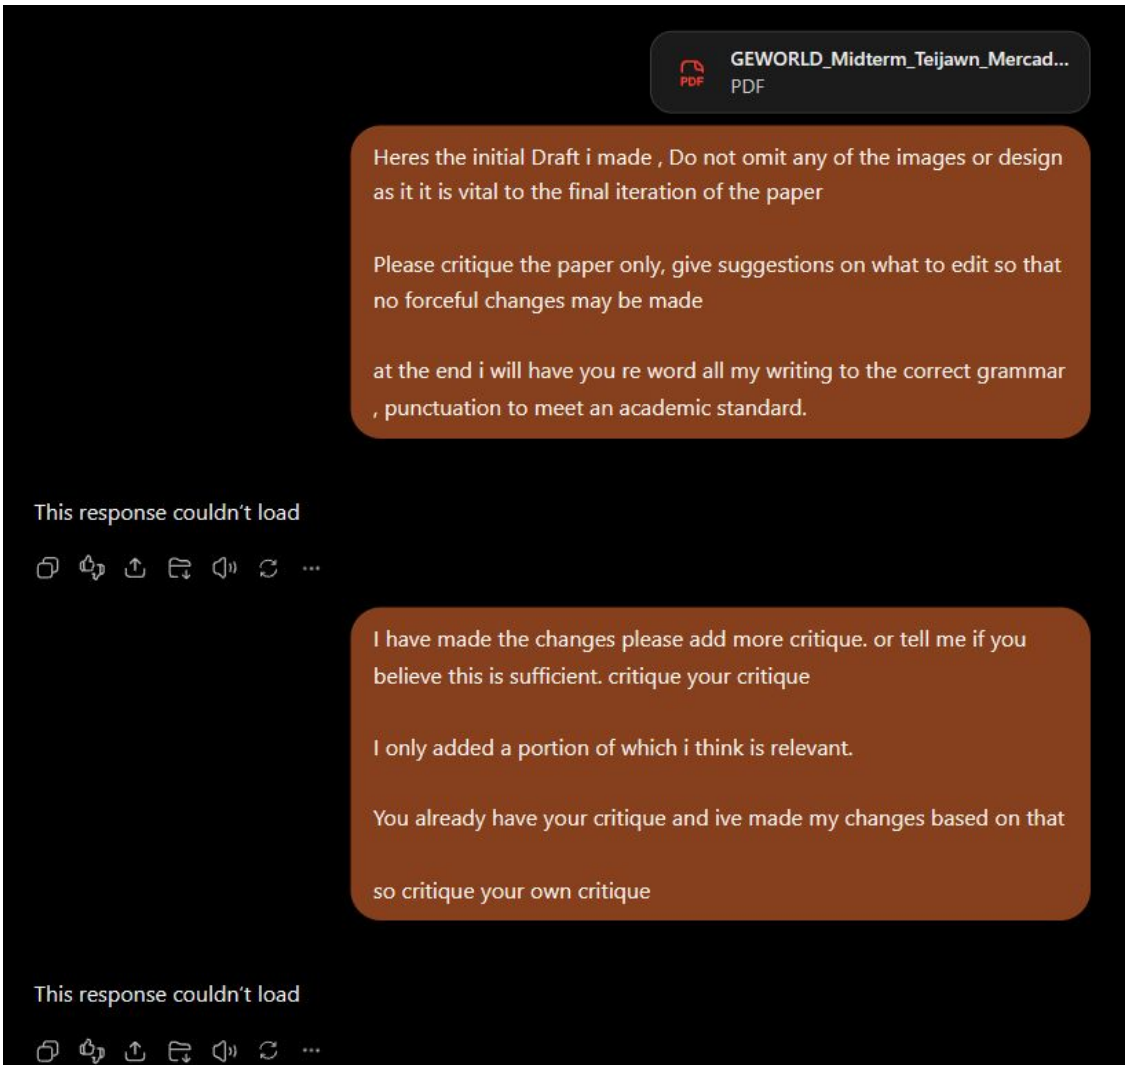

Figure 1. Full chat capture, part 1: the initial critique request and follow-up assessment.

End of the Chat and Generated Output

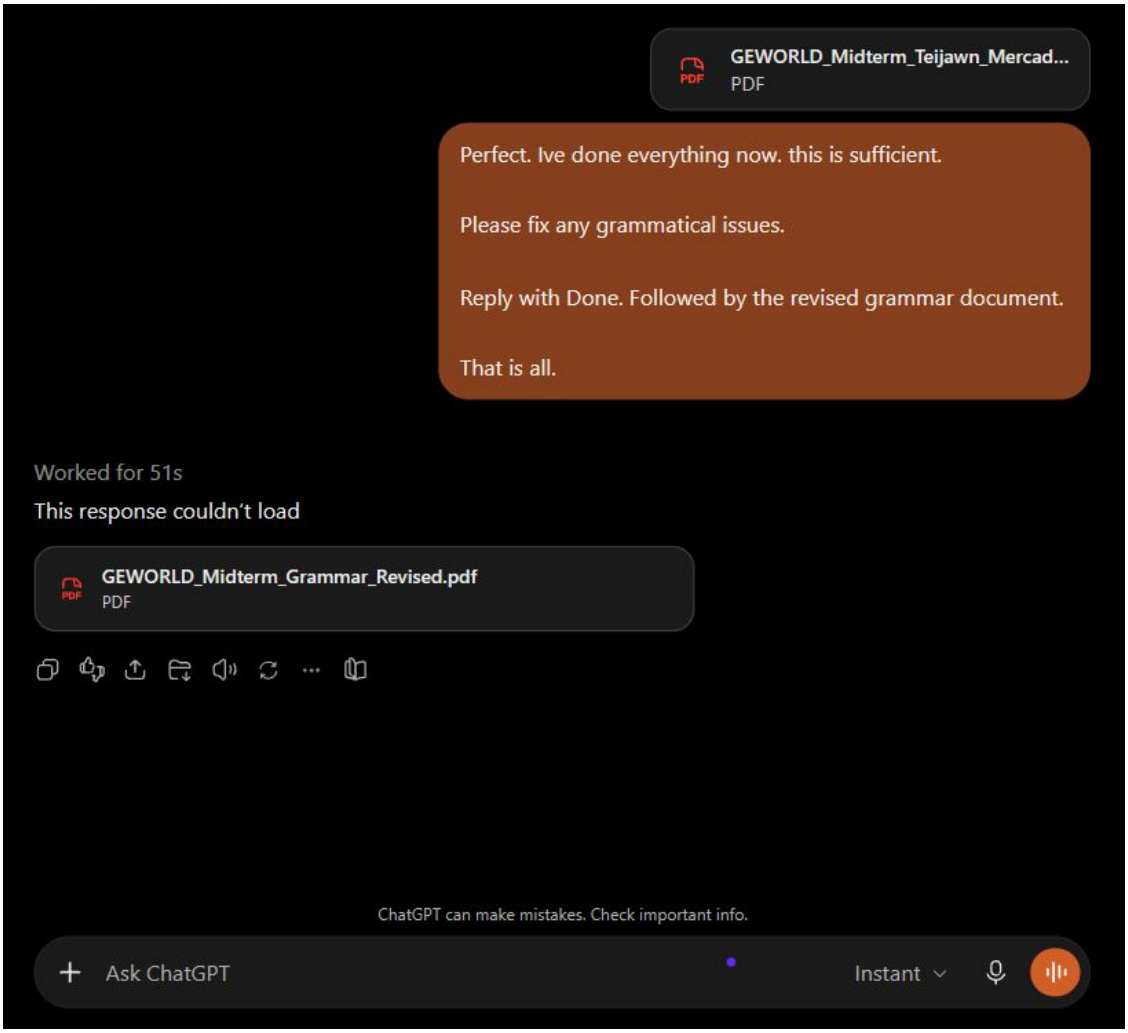

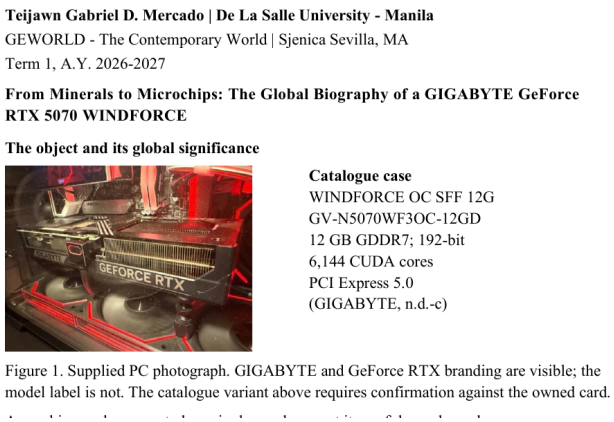

Figure 2. Full chat capture, part 2: my final request, the generated PDF attachment, and the empty message box.
